California Notice 2014-02

NOTICE TO PESTICIDE REGISTRANTS  
REGARDING INITIATION OF RISK ASSESSMENT PROCESS  
FOR THE ACTIVE INGREDIENT  
**SULFUR DIOXIDE**  
(COMMODITY AND WINE PRODUCTION USES)

This notice informs registrants that the Department of Pesticide Regulation (DPR) is initiating the risk assessment process for registered pesticide products containing commodity and wine production uses of the active ingredient sulfur dioxide.

Food and Agricultural Code (FAC) sections 13121-13130 require DPR to review the toxicology database of all registered pesticide active ingredients. FAC section 13134 requires DPR to assess dietary risks associated with the use of pesticides. In addition, FAC section 12824 requires DPR to endeavor to eliminate from use in California any pesticide that endangers the agricultural or nonagricultural environment. DPR identified sulfur dioxide as having potential adverse health effects in studies of sufficient quality to allow risk characterization.

During the risk assessment process, DPR evaluates the significance of the adverse effects to human health. If DPR decides that use of, or certain uses of, pesticide products containing the active ingredient sulfur dioxide result in a significant adverse effect to human health, action must be taken to mitigate the adverse effect.

To view the studies DPR currently has on file for this active ingredient, you may search DPR's pesticide data index at <http://apps.cdpr.ca.gov/ereglib/main.cfm>. If you have additional information or data that you believe are relevant to this risk assessment, please submit them to DPR. Please address all submissions to:

Risk Assessment – (Sulfur dioxide)
