

## ADDENDUM TO THE FINDING OF EMERGENCY

In subsections 6148(a) and 6148.5(a), DPR made minor changes, removing “Effective October 1, 2024,” from the regulation text. This language is not needed as the regulations will already become effective on this date.

In response to public comment, DPR has decided to not move forward with proposed subsection 6148.5(b) concerning amendments allowed by a notification of minor change. DPR will initiate a separate regulatory action to amend regulations regarding fees for amendments allowed by a notification of minor change as soon as possible.

On page 4 of the Application for Pesticide Registration DPR-REG-030 (Rev. 10/24), a form incorporated by reference in section 6170, DPR reworded the proposed informative language regarding the California Electronic Submission Tracking (CalPEST) System. Additionally, on page 5 of the form, DPR corrected the cross-reference to Government Code section 6254.2(l), which was renumbered to 7924.330.
