

Attachment: Diphacinone & Diphacinone Sodium Salt Products by Registrant

As of May 19, 2023, 56 pesticide products containing the active ingredient diphacinone and diphacinone sodium salt were registered for sale and use in California. DPR determined the 56 products listed below are subject to the proposed decision to initiate reevaluation based on their potential to adversely impact non-target wildlife.

Products are listed alphabetically by registrant name. If a product was only recently registered or the product is not currently registered, it may not appear on the list below. To generate an updated version of this list visit DPR's California Product/Label Database Application at [Search for Pesticide Products Using Multiple Variables](#). Enter the diphacinone and diphacinone sodium salt DPR chemical codes "225" and "1636" into the sections labeled chemical codes 1 and 2. Select the operator "Less than" for both and enter "100" in the % section. Lastly, select the "OR" option and check the "Retrieve actively registered products only" before clicking the "submit" search at the bottom of the webpage.
